

VOWST®—the only FDA-approved microbiome treatment in oral capsules that helps prevent *C. diff* from coming back again

VOWST®
(fecal microbiota spores, live-brpk) capsules

C. diff infection can hit 1 in 4 people again

**KNOCK OUT THE CHANCE
OF ANOTHER *C. DIFF*
RECURRENCE WITH THE**

**1-2
GUT PUNCH**

**OF VOWST FOLLOWING
AN ANTIBIOTIC**

VOWST used following antibiotic treatment can prevent *C. diff* recurrence better than an antibiotic alone

INDICATION

What is VOWST?

VOWST is a prescription medicine used to prevent *Clostridioides difficile* (*C. diff*) infection from coming back in people 18 years of age or older after antibiotic treatment for *C. diff* infection has been completed.

VOWST is not intended for treatment of *C. diff* infection.

IMPORTANT SAFETY INFORMATION

Do not take VOWST at the same time as antibiotics. VOWST contains live bacteria and antibiotics can interfere with VOWST.

Swallow each capsule whole. DO NOT crush, chew, or break the capsule. See Patient Information for complete information about how to take VOWST.

Please see Important Safety Information throughout and full [Prescribing Information](#) and [Patient Information](#).

THE RISK OF *C. DIFF* RECURRENCE

C. diff can come back, even after being treated with an antibiotic—this is called a **recurrence**.

C. diff can happen to anyone, but there are certain factors that can increase your risk of it coming back:

- ↑ Taking antibiotics
- ↑ Being 65 years of age or older
- ↑ Staying in a hospital or nursing home
- ↑ Having a weakened immune system
- ↑ Use of proton-pump inhibitor (PPI) therapy for acid reflux
- ↑ Being exposed to *C. diff* germs

While antibiotics can kill *C. diff* bacteria, they are a main risk factor for getting a recurrence

C. diff comes back in about
1 IN 4 PEOPLE (25%)

For those 1 in 4 people, once it comes back, your risk of recurrence increases up to

65%

When *C. diff* comes back, you may recognize some common symptoms. Talk to your healthcare provider if you are having*:

Frequent, uniquely bad-smelling diarrhea

Painful stomach cramps

Fever

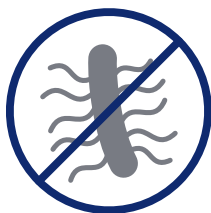

Nausea and loss of appetite

*These are the most common recurrent *C. diff* symptoms, but not all possible symptoms.

WHEN USED ALONE, ANTIBIOTICS DO NOT ADDRESS THE IMBALANCE THAT CAN CAUSE *C. DIFF* TO RETURN

The role of antibiotics in *C. diff*

Recurrent *C. diff* has historically been treated with antibiotics alone. Antibiotics are important because they kill *C. diff* bacteria that cause your infection, but they do not restore the balance of good and bad bacteria in your gut, which can lead to *C. diff* coming back.

Your intestine is full of trillions of bacteria that make up the gut microbiome

Why the balance of good and bad bacteria is important

Good bacteria Bad bacteria

In a healthy gut microbiome, good and bad bacteria are balanced

But if your gut gets disrupted, your body's natural defense against *C. diff* is weakened

This causes some people to get *C. diff* again and again

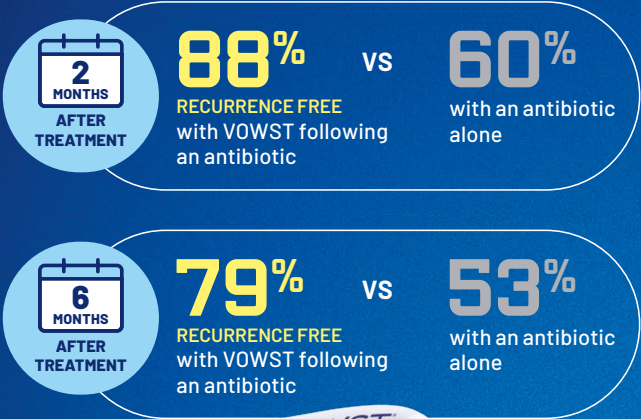

Taking a microbiome treatment that adds good bacteria to the gut may help prevent *C. diff* from returning

VOWST® USED AFTER AN ANTIBIOTIC CAN HELP PREVENT ANOTHER *C. DIFF* RECURRENCE

In a 6-month clinical study, the majority of people given the 1-2 GUT PUNCH of VOWST following an antibiotic did not have *C. diff* come back

Percentage of people who were recurrence free after finishing treatment

MOST COMMON SIDE EFFECTS OF VOWST

VOWST was generally well tolerated—the most common side effects were mild to moderate

In a clinical study, these side effects were seen in people taking VOWST after antibiotics and people taking antibiotics alone:

	People taking VOWST	People taking ANTIBIOTICS ALONE
Bloated abdomen	31%	29%
Fatigue	22%	22%
Constipation	14%	11%
Chills	11%	8%
Diarrhea	10%	4%

These are not all the possible side effects of VOWST—be sure to tell your healthcare provider about any side effect that bothers you or does not go away

IMPORTANT SAFETY INFORMATION (CONTINUED)

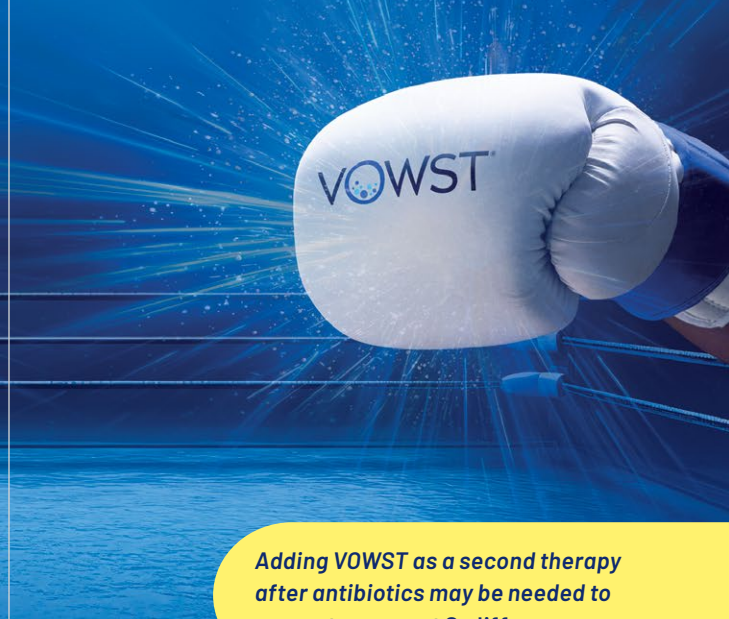

Before taking VOWST, tell your Healthcare Provider about all your medical conditions, including if you: have kidney disease because you may not be able to take the magnesium citrate laxative; or have any other medical conditions now or have had before, are pregnant or planning to get pregnant, or are breastfeeding.

Tell your Healthcare Provider about all the medicines you take, including prescription and over-the-counter medicines, vitamins, and supplements.

You may report side effects to Aimmune Therapeutics, Inc. at 1-833-246-2566, or to the FDA at 1-800-FDA-1088 or at www.fda.gov/MedWatch.

Please see Important Safety Information throughout and full Prescribing Information and Patient Information.

HOW DOES VOWST® WORK?

VOWST is believed to work in the following way to prevent recurrent *C. diff**

Adding VOWST as a second therapy after antibiotics may be needed to prevent recurrent *C. diff*

FIRST ANTIBIOTICS

Kill *C. diff* bacteria that cause your infection

THEN VOWST

Works differently than antibiotics to add back good bacteria to your gut

Good bacteria Bad bacteria

This is thought to help restore the balance of good and bad bacteria in your gut microbiome

Which can help prevent *C. diff* from coming back again

VOWST is not a probiotic.
*It is not fully understood how VOWST works.

IMPORTANT SAFETY INFORMATION (CONTINUED)

The most common side effects of VOWST are:

- bloated abdomen
- chills
- fatigue
- diarrhea
- constipation

These are not all the possible side effects of VOWST. Call your Healthcare Provider for medical advice on side effects. You are encouraged to report negative side effects to the FDA. Call 1-800-FDA-1088 or visit www.fda.gov/MedWatch.

Please see Important Safety Information throughout and full Prescribing Information and Patient Information.

(fecal microbiota spores, live-brpk) capsules

HOW DO I TAKE VOWST®?

VOWST is taken orally at home after antibiotics in a 2-step dosing routine

WHY DO I HAVE TO TAKE A LAXATIVE?

STEP 1 Finish a full course of antibiotics

You should have on hand the laxative your healthcare provider prescribed to take within 1-3 days after finishing the antibiotic.

THEN

10 ounces

Drink the single-dose, 10-ounce laxative (typically magnesium citrate) within 1-3 days after finishing the antibiotic. But your healthcare provider may recommend something different, for example, if you have kidney disease.

3 DAYS

STEP 2 Take 4 capsules of VOWST orally once a day for 3 days

Do not eat or drink for at least 8 hours before your first dose of VOWST.

For example, you can take the laxative in the evening (at least 8 hours before taking the first dose of VOWST) and fast overnight.

- Take VOWST before your first meal, on an empty stomach
- Swallow each capsule whole. DO NOT crush, chew, or break the capsules
- Do not take VOWST at the same time as antibiotics or the laxative

Visit vowst.com/how-do-i-take-vowst to learn more about how to take VOWST

Taking a laxative is important because it can rid your gut of any leftover antibiotics so that VOWST can work properly

With VOWST, you only need a 10-ounce laxative.

ONE-DOSE,
ONE-TIME LAXATIVE

10 ounces

VS

TYPICAL
COLONOSCOPY PREP

128 ounces

*"That's less than a can of soda."**

*Quote from a participant in a market research interview (09/22).

FDA APPROVED

VOWST is an FDA-approved microbiome treatment in oral capsules composed of bacteria isolated from the stool of qualified donors.

UNDERGOES STRICT QUALITY CONTROL

Qualified donors are carefully screened, and samples are routinely tested during the VOWST manufacturing and purification process.

IMPORTANT SAFETY INFORMATION

Do not take VOWST at the same time as antibiotics. VOWST contains live bacteria and antibiotics can interfere with VOWST.

Swallow each capsule whole. DO NOT crush, chew, or break the capsule. See Patient Information for complete information about how to take VOWST.

Please see Important Safety Information throughout and full [Prescribing Information](#) and [Patient Information](#).

THE VOWST VOYAGE® SUPPORT PROGRAM HELPS YOU ON YOUR TREATMENT JOURNEY*

CASE MANAGER CALL

VOWST® is only available through specialty pharmacy delivery. After your healthcare provider helps enroll you in the VOWST Voyage Support Program, a case manager will verify whether VOWST is covered under your insurance plan and let you know **which specialty pharmacy will ship your VOWST prescription.**

DELIVERY SCHEDULING

Next, you will receive a scheduling call for your VOWST prescription—it is very important you answer the call to accept your VOWST shipment.

WELCOME KIT SHIPMENT

Finally, the case manager will contact you to answer any questions you may have about the program and coordinate the shipment of a welcome kit, which may contain your laxative, directly to your home.

DOSING TEXT REMINDERS

Once you get your shipment of VOWST, you'll get helpful text message reminders each time you should take a dose of VOWST (you will only receive text messages if you opt in to receive them).

*You do not have to enroll in the VOWST Voyage Support Program to be prescribed VOWST.

VOWST
Voyage®

THE VOWST VOYAGE SUPPORT PROGRAM ALSO OFFERS FINANCIAL ASSISTANCE TO ELIGIBLE PATIENTS

VOWST Co-Pay Savings Program

The VOWST Co-Pay Savings Program may be used to reduce your out-of-pocket cost for VOWST to as little as \$0, subject to annual limits. Offer not valid for patients whose prescriptions are reimbursed by Medicare, Medicaid, or other state or federal healthcare program, or where prohibited by law.

To read the full Terms, Conditions and Eligibility requirements, visit VOWSTcopay.com.

VOWST Patient Assistance Program

Uninsured or underinsured patients may be eligible to receive VOWST at no cost if you meet financial and other eligibility requirements.

If you have concerns about affording your VOWST prescription, please contact us at 888-356-5444 and we may be able to help

Please see Important Safety Information throughout and full [Prescribing Information](#) and [Patient Information](#).
